

7 REASONS WHY WOMEN ARE TURNING TO NON-SURGICAL SKIN TIGHTENING

By Dr. Robert Applebaum, Board Certified Plastic Surgeon
Chief Medical Director, Liftique Naturelle M.D.

Most women first notice skin laxity in their face and neck when they're busy living, working and enjoying full lives. And it's the stresses of daily life that can cause anyone to look and feel tired. Not liking what they see in the mirror can become even more troubling, when major life events approach.

For these women, treatments that only offer minimal improvement are not an option. And neither are surgical solutions that require lengthy downtime and recovery along with surgical incisions.

Here are 7 important reasons why many women are choosing less invasive non-surgical, minimally invasive skin tightening procedures.

1. Noticeable Results: The goal is to look younger with visible levels of improvement. While serums and creams can improve the skin's appearance to a minor degree at best, getting noticeable results can often take time. Minimally invasive skin tightening procedures can obtain results with a single treatment.

2. **Less downtime:** With non-surgical minimally invasive skin tightening, you can quickly get back to your normal activities in a fraction of the time required by surgical procedures.
 3. **Natural looking, tighter skin:** Minimally invasive skin tightening procedures enable women to look refreshed and healthy. By softening wrinkles and supporting youthful contours, a non-surgical solution can turn back the clock on your skin's appearance.
 4. **Natural healing:** With non-surgical skin tightening, like the radiofrequency technology offered by Liftique Naturelle, women benefit from a holistic solution that works from the inside out, to boost collagen and elastin production. Essentially, it stimulates the body's own physiological systems to heal naturally.
 5. **Virtually no pain:** Following the Liftique procedure you will not require any pain medication because of the nature of the procedure. The swelling will resolve over a few days and you can return to your routine much quicker than a true surgical procedure.
 6. **Results that last:** After one visit, most women may not need to come back for up to three years. However, you will need to follow your skin care regime to make your results last.
 7. **Safe, minimally invasive procedure:** There is only light sedation, often called "twilight" sedation, necessary for these types of procedures. That means peace of mind for you and your family.
- Liftique Naturelle M.D. offers natural looking, tighter, smoother skin in a single visit, without scalpels, lasers, peels, or pain.
